

Accountability Factsheet: Feminist Action for Climate Justice Action Coalition Contributes to Climate Justice

For All Women and Girls - Climate Justice

A meaningful just transition is only feasible through leveraging women's and girls' knowledge and leadership. The Feminist Action for Climate Justice Action Coalition within the Generation Equality initiative amplifies the voices of women and girls in climate action, especially in grassroots communities. Its collective aim is to enable a transition to an inclusive, circular, regenerative green economy that integrates climate justice, prioritizing gender-responsive climate finance, women-led sustainability solutions and resilience-building. This can be achieved through the meaningful participation and voice of women and girls, as well as improved gender and environment data, which are a prerequisite to fulfill the Beijing+30 Action Agenda on climate justice.

SHOWCASED PRACTICES

Green Climate Fund Projects Advance Gender Integration (Republic of Korea)

Since the adoption of the Updated Gender Policy in 2019, 122 Green Climate Fund (GCF) projects have been endorsed, all with gender-responsive assessments and Gender Action Plans. Of 243 projects in portfolio, 96.3% of GCF investments are gender-responsive. The GCF remains committed to supporting continuous improvement in gender-responsive projects.

ACNDC Engages Women in Climate Action and Conservation (Democratic Republic of the Congo)

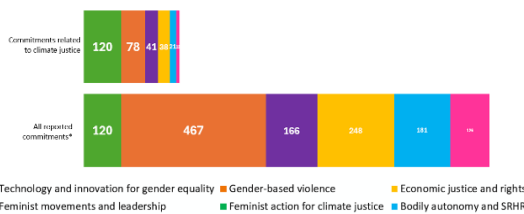

Actions for Nature Conservation and Community Development (ACNDC) organized three land-based expeditions, equipping over 105 women with climate information. The initiative led to the development of participatory community maps and three landscape restoration and conservation plans, strengthening women's involvement in climate action across South Kivu and North Kivu.

IFAD Financing Program ASAP+ Empowers Smallholder Farmers Worldwide (HQ in Italy)

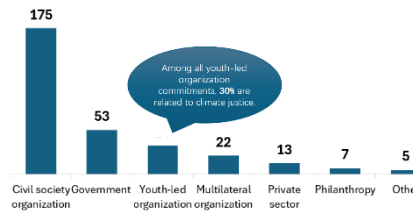

ASAP+ (Adaptation for Smallholder Agriculture Programme Plus) has mobilized US\$92.1 million, supporting 10 investment projects to help smallholder farmers adapt to climate change. While no funds were raised last year due to IFAD13 replenishment campaigns, mobilization will resume. Disbursements have supported 20,000 family farms in Brazil, benefiting Indigenous communities, women, and youth, and strengthened smallholder farmers' access to irrigation and markets in Malawi, focusing on women's empowerment.

This factsheet was produced by the Accountability Framework team in March 2025 using data from the 2024 Commitments Survey. Contact us at: GEF-accountability@unwomen.org

Digital Revolution Across Action Coalition Commitments

What Organization Type is Committing More?

Note: The data used for this factsheet come from the 2024 Commitments Survey. Due to the cross-cutting nature of Actions under the Action Agenda, the sample includes all commitments under the Action Coalition on feminist action for climate justice (FACJ), as well as commitments under other Action Coalitions which identified FACJ as a relevant additional Action Coalition.

Note: The numbers above each bar represent the number of commitments made by organizations of that type. The "Youth-led organization" also includes adolescent organization. The "Other*" category also includes media organizations, as well as academic and research institutions.

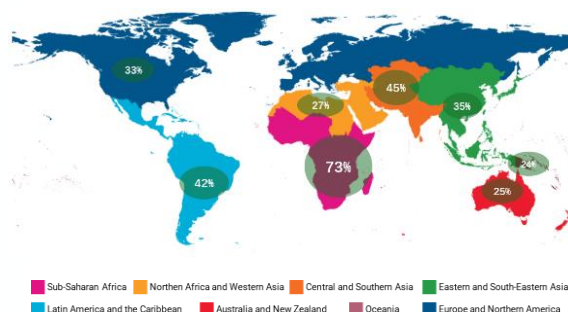

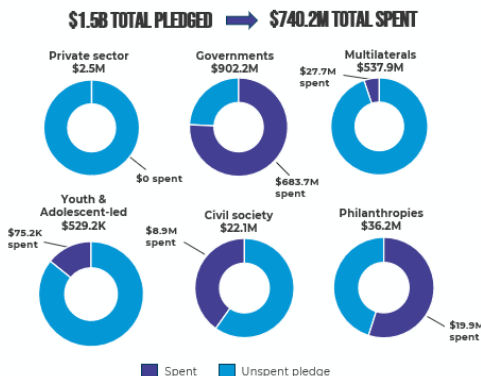

Generation Equality as A Driver of Climate Justice

Note: Commitments can fall into multiple different categories, so the sum of different commitment types exceeds the total number of commitments. Each commitment can have multiple Action Areas. Additionally, the fourth FACJ Action Area does not appear here because it cannot be mapped to the Action Agenda. It is "Increase collection and use of data on the gender environment nexus. Action Areas are elaborated on in the [Global Acceleration Plan](#).

Financial Pledges and Spending on Climate Justice

Regions of Commitments Implementation
